The graphics on this game are so bad that they looked like they had been rendered by a 5 yr old who got loose on a very old edition of Daz3D or poser 4, the game makers have no clue of cloth physics or dynamics and really need to relook at using possibly genesis or Victoria 4 for their character, I've sold better looking 3D products than the plastic looking clothes in this game. Although I know the designer is aiming to possibly update the game please look into bitmaps and more to improve the quality of the characters, as well as movement dynamics of clothes moving.. this alone made me shudder.

No real instructions, straight into character selection, start menu would've been useful and a lot more. Come on guys please use your eyes this game is seriously graphically at least not ready for release by any shape or standard, it's pre-early access. girl amazon survival. <https://youtu.be/PMaw39KLb70>

Wow where to start with this one? Maybe the awful graphics, or maybe the even worse animations? The poor sounds or the cumbersome controls. I know - the awful combat against a constant sea of constantly respawning and ugly undead. Seeing as combat is at the heart of this 'game' you would think the devs would have refined it to at least be half decent? Well no, they didn't. Oh and the zombies don't make any noise until they are attacking you so prepare to be half dead before you even know your in danger.

So how is the survival aspects? Pretty poor - you get mini in game missions which reward you with in game money which stays with your character. So its often easier just to buy what you need before spawning back in. This is true for ammo which seems scare as hell. Not that it matters as the spear or sword are the best weapons in game anyway so you will hardly ever shoot anything anyway.

So all in all - save your money as I have not seen one update to this 'early access' game since purchase - and I don't think it will ever become anything other than the tedious mess it is right now.. super cool game

+good controls

overall i can really feel the passion put into this game, gj devs!. Playing Rust admiring men.
Playing Girl Amazon Survival admire the girls.

DOES RUN ON IBM.. A no buy. Rating 1/10. 1 Just for being a game. A sucky one at that.

This has single player and multiplayer. I only played the single player.

When I saw this game on the store page the name grabbed me but I hated the graphics in the trailer and I told the developer the game looked horrible and that he should remake the game in Unreal. Unity sucks. But afterwards I felt bad and since the game was under \$1 I figured I'd support the dev and help him buy assets for Unreal so he can remake his game so it at least looks good.

After playing the game for a short while. My opinion of the game still stands.

When I started the game I noticed I must of been in a plane crash and landed in the jungle or on an island. Sound familiar? And then I noticed that out of nowhere zombies are spawning and attacking me and they keep spawning from a spot for no reason. So I run and run until I see a beach with a nippa/bamboo dock and when I walk up there are zombies already there. I run and run and am wonder what to do. How can I defend myself. "Oh look !!. My inventory has a machine gun and a flamethrower already in it." Hmmm. Are airline passengers allowd to carry guns on board? Maybe in the country I am in. But flamethrowers? So really if I go on I will just judge this thing more harshly. Oh I went back to the dock and killed the zombies and they just kept spawning at a spot on the hut that is over the water. Hmmm? Whaaaatt?? I don't get it. If the developer remakes the game with way better graphics and game play and animations which are horrible then I will play this again. Possibly good idea for a shooter/survival game but junkie for my taste.. this game is one of the worst ♥♥♥♥ing things ever do not even buy as a joke... Best game ever 100/69 , the graphics ar da best it looks like ☹☹ , Would buy again,. Best game I've ever played definitely worth playing!. Worse headache and motion sickness than any game I've played on my Vive.... Impressive....
